

# INDEX OF AUTHORS' NAMES.

## ABSTRACTS. 1883.

### A.

- Abeles, M., secretion of the kidney fed with defibrinated blood, 875.
- Abelli, M., chlorides of ortho- and meta-nitrobenzyl, 1092.
- Abney, W. de W., and R. Festing, atmospheric absorption of the infrared of the solar spectrum, 837.
- Abraham, K., the currents of the gases in sulphuric acid chambers, 129.
- Agrestini, A., derivatives of naphthalene hexhydrides, 345.
- Albrecht. See Will.
- Allen, J. C., nitronaphthalene-disulphonic acids, 596.
- Alexejeff, W., mutual solution of liquids, 11.
- Allen, A. H., action of water on lead, 128.
- Allen, C. L., composition of two specimens of jade, 163.
- Allihn, F., reducing power of grape-sugar for alkaline copper solutions, 244.
- Allihn. See also Degener.
- Amagat, E. H., compressibility of nitrogen, 150.
- Amthor, C., glycerol in beer, 385.
- studies on ripe grapes, 881.
- Anacker, poisoning of cattle by earthnut-cake, 818.
- André, G., ammonio-bromides and oxybromides of zinc, 713.
- double chlorides of lead and ammonium and oxychlorides of lead, 717.
- double salts of lead, 903.
- Andreasch, R., oxidation of the bases obtained by the action of halogen compounds on thiocarbamide, 664.
- potassium ethylene-disulphonate, 912.
- Andreasch. See also Maly.
- Anschütz, R., action of aluminium bromide on symmetrical dibromethylene and benzene, 807.
- Anschütz, R., and F. Eltzbacher, new synthesis of anthracene, 809.
- — synthesis of unsymmetrical tetraphenylethane, 1132.
- Ansdell, G., critical point of mixed gases, 277.
- Arbos, J., pyrolein, 519.
- Archbold, G., a new method of manufacturing paper pulp, 759.
- Arnell, K. E.,  $\alpha$ -chloronaphthyl-sulphonic acid, 595.
- Arnold, C., estimation of organic nitrogen, 378.
- new colour reactions of the alkaloïds, 386.
- poisonous principles contained in certain lupines, 740.
- Arnold, H., bromine amalgamation process, 399.
- Aronstein, L., transformation of propyl bromide into isopropyl bromide, under the influence of heat, 172.
- Arzruni, A., artificial and natural gaylussite, 430.
- dietrichite, 433.
- jadeite axe from Rabbes, Hanover, 437.
- Arzruni. See also Cossa.
- Aschan, O., action of phenylthiocarbimide on amido-acids, 1107.
- Aschenbrandt, H., paradiethylbenzene, 318.
- Attfield, J., sap, 1164.
- Atwater, W. O., chemistry of fish, 1179.
- Aubin. See Müntz.
- Austin, P. T., preparation of stannic oxide from sodium stannate, 425.
- Austin, P. T., and G. B. Hurff, reduction of ferric salts, 511.

### B.

- Bachmann, A., aldehydethyl chloride and behaviour of acetals to alcohols at a high temperature, 726.

- Bachmeyer, W., test for organic acids in phenol, 385.  
 — test for sodium carbonate in milk, 385.  
 Baerwald, C., analysis of a pyromorphite from Zähringen in Baden, 1063.  
 — analysis of crocoisite, 1063.  
 — thenardite from Aguas Blancas, 434.  
 Baeyer, A., benzoylactic acid, 336.  
 — nitroso-oxindole and nitroso-indoxyl, 1131.  
 Baeyer, A., and P. Becker, paranitrobenzaldehyde and acetone, 1120.  
 Baeyer, A., and F. Bloem, orthamidophenylpropionic acid and its derivatives, 196.  
 Baeyer, A., and W. Comstock, oxindole and isatoxime, 1130.  
 Baeyer, A., and V. Drewsen, preparation of indigo-blue from ortho-nitrobenzaldehyde, 341.  
 Baeyer, A., and S. Economides, isatin, 201.  
 Bahrman, R., amarine and furfure, 799.  
 Bailey, E., dried alum, 1053.  
 Balbiano, L., dry distillation of sodium dibromanilate, 1125.  
 Ballo, M., carbonic hydrate, 574.  
 — platinised magnesium as a reducing agent, 1053.  
 Balsohn. See Friedel.  
 Bamberger, E., Bechi's so-called picanalcime from Monte Catini mine, Monte Caporciano, 438.  
 — dicyanodiamide, 907, 1090.  
 — formation of phenylxanthamide, 185.  
 — melanuric acid, 1086.  
 Barbier, P., liquid terebenthene hydrochlorides, 809.  
 Barbieri. See Schulze.  
 Baret, chlorophyllite from Loquidy, near Nantes, 443.  
 Barff, and others, preservation of milk, &c., 253.  
 Barker, G. F., secondary batteries, 765.  
 Barlow, W. H., mechanical properties of aluminium, 424.  
 Barner, F., crystallographic examination of  $\alpha$ - $\beta$ -dinitroparaxylene and of dinitroparaxylene (m. p.  $93^{\circ}$ ), 179.  
 Barnes, J. B., separation of chlorine, bromine, and iodine, 1167.  
 Barret. See Wood.  
 Barth, L., and J. Schreder, action of melting potassium hydroxide on benzoic acid, 468.  
 — fusion of orcinol and gallic acid with soda, 59.  
 — hydroxyquinol, the third isomeric trihydroxybenzene, 987.  
 Barth. See also Nessler.  
 Barthélemy, A., respiration of aquatic and submerged aëro-aquatic plants, 747.  
 Bartoli, A., constitution of electrolytes, 540.  
 Bartoli, A., and G. Papasogli, electrolysis of hydrofluoric acid and of potassium antimonate with carbon electrodes, 590.  
 — electrolysis of water and of solutions of boric acid, 540.  
 — electrolysis with carbon electrodes of solutions of binary compounds and of various acids and salts, 592.  
 Basaroff, A., oxidation of sulphur in the air, 551.  
 Bastelaer, A. v., analysis of butter, 246.  
 Baubigny, transformation of amides into amines, 175.  
 Baubigny, H., action of ammonium sulphide on stannous sulphide, 22.  
 — action of heat on an acid solution of nickel sulphate in presence of hydrogen sulphide, 25.  
 — action of hydrogen sulphide on nickel sulphate in acetic acid solution, 25.  
 — action of hydrogen sulphide on solutions of normal nickel sulphate, 24.  
 Baudet, prevention of boiler incrustation, 408.  
 Baudrowski, E., acetylenedicarboxylic acid, 313.  
 — propargylic acid, 314.  
 Bauer, A., new acids of the series  $C_nH_{2n-4}O_6$ , 970.  
 — pimelic acid, 998.  
 Bauer, A. H., preservation of beer, 136.  
 Bauer, E., influence of invertin on the fermentation of cane-sugar, 101.  
 — nature and formation of dextran, 105.  
 Bauer, M., dioptase from the Cordilleras of Chili, 446.  
 Bauer. See also Classen.  
 Baumann, E., detection and estimation of phenols and oxy-acids in the urine, 885.  
 Baumert, G., action of dehydrating agents on lupinine, 100.  
 — preparation of lupinine hydrochloride from lupinine residues, 224.  
 Baumhauer, H., the trapezohedral hemihedry of strychnine sulphate, 485.  
 Baur, C., radiation of rock-salt at various temperatures, 702.

- Baur, H. v., and W. Staedel, dimethylxylydines, dimethylmetachloraniline, and dimethylmetamidophenetoil, 579.
- Becchi, E., prehnite and laumontite from Monte Catini, 442.
- Becchi. See also Corsi.
- Béchamp, A., action of hydrogen peroxide on the red colouring-matter of the blood and on hæmatosin, 103.
- decomposition of hydrogen peroxide by certain organised bodies, 103.
- evolution of oxygen from hydrogen peroxide by fibrin, 225.
- microzymas, the cause of the decomposition of hydrogen peroxide by animal tissues, 103.
- spontaneous fermentation of animal matter, 226.
- zymase of human milk, 926.
- Beck, W. v., and J. W. v. Muschketow, nephrite, 1068.
- Becke, F., euclase from the Alps, 34.
- hornblende and anthrophyllite after olivine, 444.
- Becker. See Baeyer and Claus.
- Beckmann, E., barium aluminates, 289, 649.
- basic halogen salts of barium, 649.
- Becker, P., metanitrodiphenylmethane, 202.
- Beccuerel, H., observations of infra-red spectra by means of phosphorescence, 761.
- Beer, A., itamalic, paraconic, and aconic acids, 457.
- Behr. See Soxhlet.
- Beilstein, F., and E. Wiegand, alkylsulphamic acid, 971.
- — — Caucasian ozokerite, 1073.
- — — some ethereal oils, 346.
- Bell, J., chemistry of food, 1160.
- Bellati, H., and R. Romanese, specific heat and heat of transformation of silver iodide and its alloys with cuprous and lead iodides, 274.
- Bemmelen, J. M. v., glucinum hydrated oxides, 291.
- Bender. See Bernthsen.
- Benedikt, R., chloroxy- and bromoxy-derivatives of benzene, 984.
- nitro-derivatives of resorcinol, 803.
- test for resorcinol dyes, 689.
- Benedikt, R., and M. v. Schmidt, halogen-derivatives, 1118.
- Benz, G., primary and secondary naphthylamines, 594.
- Berger. See Hönig.
- Bernthsen, A., methylene-blue, 916.
- formation of nitril bases from organic acids and amines, 1099.
- Bernthsen, A., nitrotoluidines from liquid nitrotoluene, 579.
- preparation of the base  $C_{19}H_{13}N$  from benzoyldiphenylamine, 580.
- Bernthsen, A., and F. Bender, acridine, 1134.
- — — derivatives of styrolene, 70.
- — — synthesis of acridines, 1133.
- Berthelot, alkaline thiosulphates, 707.
- alkaline metasulphites, 704.
- alkaline sulphites, 704.
- Berthollet's laws and the combinations of mercuric oxide with acids, 10.
- chromates, 707.
- decomposition of cyanogen, 303.
- direct combination of hydrogen with ethylene, 565.
- ethyl peroxide, 305.
- ethylene oxide, 174, 275.
- heat of formation of chromic acid, 642.
- lead iodides, 275.
- natural formation of manganese dioxide, and some reactions of peroxides, 425.
- perchloric acid, 8.
- properties of chlorinated organic gases and vapours, 394.
- reactions between sulphur, sulphur oxides, carbon, and carbon oxides, 551.
- reciprocal displacements of the halogens, 8.
- some relations between temperatures of combustion, specific heats, dissociation, and pressure of explosive mixtures, 771.
- the light emitted by comets, 261.
- Berthelot and Ilosvay, double salts formed by fusion, 11.
- Berthelot and J. Ogier, researches on the hyponitrites, 422.
- — — specific heat of gaseous acetic acid, 6.
- Berthelot and Vieille, nitrogen selenide, 707.
- — — wave of explosion, 777.
- Bertrand, E., optical properties of cobalt carbonate, 1062.
- optical properties of nocerine, 1060.
- walthelite from Joachimsthal, 36.
- Bertrand, E., and Damour, zinc aluminate, a new mineral species, 443.
- Beseler, manuring sugar-beet with acids, 238.
- Besthorn, E., and O. Fischer, a new class of colouring matters, 600.
- Bichat, E., and R. Blondlot, oscillations of the plane of polarisation by electric discharge, 4.
- Bidwell, J., electric resistance of carbon contacts, 841.

- Billitz, G., and K. Heumann, new modes of formation of pyrosulphuric chloride and of chlorosulphonic acid, 710.
- Billwiller, R., influence of fallen snow on the temperature of the air, 500.
- Binder. See Prudhomme.
- Binz, C., behaviour of ozone with blood, 486.
- Bischoff, C., distribution of poisons in the human organism in cases of poisoning, 1020.
- Bischoff, C. A., action of the alkyl-derivatives of the halogen substituted fatty acids on aniline, 919.
- etheral salts of propenyltricarboxylic acid, 45.
- ethyl ethenyltricarboxylate, 45.
- ethyl isallylenetetra-carboxylate, 46.
- ethyl monochlorethenyltricarboxylate, 45.
- synthesis of ketonic acids, 912.
- Bischoff. See also Conrad.
- Blake, J., relative toxic power of metallic salts, 745.
